Summary

I'm a final-year Computer Science student with a deep passion for AI, full-stack development, and creative problem-solving. Over the years, I've grown from exploring code out of curiosity to building meaningful digital experiences that connect people and ideas.

What drives me most is curiosity — the urge to understand how things work and how technology can make life simpler, smarter, and more human. I love transforming ideas into functional, user-friendly systems, whether through Java, React, Next.js, MongoDB, or AI integration.

Beyond tech, I'm someone who values empathy, learning, and growth. I've learned that great developers don't just write code — they build trust, communication, and purpose into every project.

Interests: Artificial Intelligence | Web Development | Data Science | UI/UX | Product Design
Let's connect: I'm always open to collaborations, internships, and learning opportunities that challenge me to grow beyond limits.

Experience

Devsinc
Campus Ambassador
July 2026 - Present (4 months)

Appointed as the Campus Ambassador to bridge the gap between academic learning and industry expectations for tech students.

Key Responsibilities:

Act as the primary liaison between Devsinc and the university student body to promote corporate exposure and tech career pathways.

Facilitate and organize campus events, workshops, and seminars aimed at equipping students with the practical skills and industry insights required for modern software engineering roles.
Guide and mentor peers on navigating the transition from graduation to the professional tech workforce, reducing post-grad career friction.
Represent the corporate culture and growth mindset of Devsinc to foster a more connected, career-ready student community.

Dev Weekends
Software Engineer
December 2025 - Present (11 months)
Lahore, Punjab, Pakistan

Software Productivity Strategists, Inc. (SPS)
10 months

Software Engineer Intern
October 2025 - July 2026 (10 months)

Full-Stack Development: Utilizing React 18, TypeScript, and Tailwind CSS to build modular, fully responsive customer and provider modules for a core healthcare super-marketplace. Backend & Security: Leveraging Supabase and PostgreSQL to develop backend services, implementing Row-Level Security (RLS) policies to safeguard health data and enforce zero-trust access protocols. AI Integration: Engineering natural care flows and operational automated interfaces with the OpenAI API, integrating strategic protocols for redacting protected health data (PHI). Fintech Solutions: Integrating multi-tier installment pricing systems and flexible processing flows powered by Stripe Connect and LaaS endpoints. System Architecture: Maintaining a clean and robust database architecture containing 200+ relational tables while managing event-driven integration loops for state synchronization.

Software Developer Intern
October 2025 - June 2026 (9 months)
Islamabad, Islāmābād, Pakistan

Currently contributing to the development of Humankind, a unified healthcare super-marketplace designed to streamline discovery, booking, and financing for clinical and wellness services.

Key Technical Contributions:

Full-Stack Development: Utilizing React 18, TypeScript, and Tailwind CSS to build complex, responsive user interfaces for Consumer and Provider portals.

Backend & Security: Leveraging Supabase (PostgreSQL) for backend services, focusing on Row-Level Security (RLS) to enforce zero-trust data access and maintain HIPAA compliance.

AI Integration: Implementing intelligent care navigation and automated clinical workflows using the OpenAI API, with a focus on PHI redaction and safety-first design.

Financing & Fintech: Developing embedded financing solutions via Stripe Connect and LaaS integrations to provide transparent, installment-based pricing models.

System Architecture: Managing a robust data schema with 200+ tables and coordinating cross-platform data sync through an Event-Driven Integration Hub.

Buildables
Data Scientist
August 2025 - November 2025 (4 months)

CosmiCode
Python Developer
July 2025 - October 2025 (4 months)

ZeroAI Lab
Full Stack Developer
June 2025 - August 2025 (3 months)

Certura
Full-stack Developer
April 2025 - May 2025 (2 months)
Pakistan

DevelopersHub Corporation©
Full-stack Developer
March 2025 - May 2025 (3 months)
IT Services and IT Consulting Islamabad, punjab

As a Full Stack Developer, I am dedicated to designing and developing dynamic, user-friendly applications that enhance business operations.

Education

National University of Modern Languages (NUML)

Bachelor of Science, Computer Science · (February 2023 - February 2027)
